R-DAF-20 GASOIL Antifreeze

GASOIL Antifreeze is the best solution for icy days

DESCRIPTION

Diesel Antifreeze is an anti-freeze additive for diesel fuel. It can be used in all types of automotive diesel. Even those containing high percentages of bio-diesel (B5, B7, B10). Ensuring its operation down to -20°C . It is suitable for all engine fuel systems and avoids blocking due to freezing.

Benefits:

- Avoid freezing of diesel fuel in winter.
- Also suitable for bio-diesel.
- Significantly improves the efficiency of cold diesel fuel.
- Neutralizes water condensation in the fuel tank.
- Quick and easy to use, just add it directly to the tank.
- Prevents adhesion and flocking of diesel in extremely cold conditions down to -20°C .

Other features:

- Suitable for cars and light vehicles
- Suitable for trucks and heavy vehicles cleaning
- Free from PBT and vPvB

USAGE

During the cold seasons, it is recommended to use it in every full tank. An entire of 200 ml treats a quantity of diesel fuel as per the table.

Gasoil Antifreeze	Diesel Fuel	Freezing Protection
1 Liter	200 Liters	-18 °C
2 Liters	200 Liters	-20 °C

TECHNICAL PROPERTIES

Property	Unit	Value	Test Method
Appearance	---	Clear to Cloudy Liquid	Visual
Color	---	Colorless to Pale Yellow	Visual
pH @ 25°C	---	As Report	--
Specific gravity @ 15 °C	---	0.9 ± 0.05	--
Pour Point	°C	Gasoil + 0.5 -30 Gasoil +0.671 -33	ASTM D97
Water Content	Wt. %	0	---
Fuel solubility	---	Complete	---

SAFETY

For detailed information, please refer to the relevant Safety Data Sheet.
